Spinning, Weaving, Knitting, Processing & Finishing

Your Partner in delivering Value
Spinning, Weaving, Knitting, Processing & Finishing
Voltas Limited was promoted in 1954 by Tata Sons Limited and Volkart Brothers, a Swiss firm that had been operating in India since 1851. Today, the company holds a position as a global air conditioning and engineering services provider, with a turnover of Rs. 5884 Crores.

With the Vision of “Driving Value through Smart Engineering”, Voltas has long been a leader in many domains of engineering and technology, as a turnkey project contractor, solutions provider, technology partner of domestic and overseas principals and marketer. Building on the strength of TATA Group’s Value “Leadership with Trust”, Voltas Textile Machinery Division is well placed to provide the ideal choice of machinery, seeing the task all the way through installation, commissioning and special services, with alliances and representations of Global leaders. Voltas TMD is especially strong in customized solutions - putting together ideal combinations of equipment and ancillaries.

These are the strengths which have earned the support of valuable customer’s faith and confidence to attain its dominant position in the textile industry. Rightly so, more than 60 years Voltas TMD is India’s most preferred supplier of Textile machinery.
Voltas’ Range of Solutions & Services in Textile Manufacturing

Fibre to Finished Fabric

Spinning → Raw material → Weaving → Processing & Finishing, Printing → Non woven & Technical Textiles → Knitting

- Start-up of textile unit: Selection of location, Planning, Design & Layout, Identifying technologies, Supply of equipments with right Technology & Project management

- Installation, Commissioning, Trouble shooting & Process optimisation
- Special Services: Customisation, application engineering, special adaptations, systems integration and Energy Management
Forming the fabric of a worldwide market

Voltas continually addresses the demands of a constantly changing global environment in textiles, one which has been transformed over the last decade. Being globally competitive, now calls for state of the art technology, expanded capacities, total reliability of delivery and requiring large-scale investment from end to end of the user value chain. Today the industry’s focus has to be not just on immediate cost-benefit bottom lines, but long-term sustainability as well. Whenever and wherever such critical investments are made, Voltas is a valuable ally, partner and resource.

Trusted technologies to mesh with industry needs

With its dedication to provide total solutions in all the textile segments represented, Voltas is continually building capabilities and offering value addition & innovation in its products and solutions. Over the years, Voltas has earned the trust of its clientele through its Smart thinking, Winning Attitude, Innovativeness, Flexibility in approach and Team work (SWIFT) in meeting the most specialized customers needs. Through the years, Voltas has been closely associated with principals whose technology base is always up-to-date and keeping pace with the market’s changing needs.

Solutions and services

Voltas offers you everything you could ask from a technology partner and solutions provider.

Located at over 16 nationwide branches, Voltas has a corps of more than 250 textiles professionals at your service. Their primary mission is to advance and equip you for your mission - to be globally competitive in a sustainable manner.

Our engineers have specialized expertise in both solutions and applications, having received extensive training at our Principals’ works. They thoroughly understand your tasks and challenges in producing a diverse range of finished products.

More than Six decades of trust & partnership with our stakeholders

Leader in adding values & providing solutions to the Textile Industry
Voltas maintains its leadership role with its presence in the organised / decentralized weaving sector offering Rapier, Airjet, Waterjet & Terry Looms from RIFA, China. With the investment trends now focusing on Shuttleless Looms, Voltas is gearing up with representation of hi-tech shuttleless weaving machines. Once again demonstrating how our product portfolio is constantly re-visited and adapted to changing needs.
